

GLOW SOLAR

Why Glow Solar?

The Glow Solar Advantage

Glow Solar is proud to help forward-thinking businesses and homeowners achieve their individual solar goals by designing and delivering customized, top-quality solar systems that provide lower-cost, clean, renewable solar energy. Every customer and system is special to us - regardless of sector, project type, or size. Here are some things we bring to every job that we feel set us apart.

- **Experienced Team.** The Glow Solar team brings over 45 years of cumulative experience in renewable energy; solar system design and delivery; project management; and customer service. To ensure the smooth delivery of top-quality systems, we use experienced NABCEP-certified team members to manage every step of our projects and lead all our installations.
- **Amazing Customer Service.** The experiences our customers have working with Glow are as important to us as the solar systems we deliver. We value quality, integrity, and transparency and are committed to providing amazing customer service, focused on clear communication, responsiveness, and respect.
- **Simple No-Cost, No-Obligation Approach.** Glow is passionate about helping customers explore the potential of solar energy. We are happy to provide the information you need to determine if solar is right for you at no cost and with no obligation, and happy to assist even if you are just looking to learn about the possibility of solar for your home, business, or farm.
- **Personalized Solar Solutions.** All properties are different and so are the people that own them. Glow makes it a priority to fully understand your home/business, energy needs, solar goals, and budget as a critical first step so we can design and deliver the optimal solar system tailored specifically to your unique situation.
- **Honest Advisor.** Glow is committed to helping customers make smart decisions about solar. We are happy to answer questions about the information in your system proposal and will tell you if we think solar is not a good investment based on your needs and priorities. If you want help evaluating alternative proposals, we'll do so honestly and make sure you understand all significant differences.
- **Local & Engaged.** As a Madison business, Glow knows local requirements and municipal and utility partners well. We are close by, happy to help, and can be on-site quickly if you need us. We embrace Midwestern values and are committed to giving back to the communities we live and work in through a variety of initiatives.
- **Fair & Responsible Economics.** Glow provides fair pricing and makes sure every project captures all available savings and credits from applicable state and federal incentive programs. We feel that financing offered by solar companies very often is not in the best interest of homeowners - so we don't provide it. If you are interested in learning more about financing options, we'll be happy to recommend well-qualified lenders for your consideration.
- **Protection & Peace of Mind.** Glow's commitment to our customers doesn't end with installation. Glow provides a 10-year workmanship warranty on our installations and all system components carry long manufacturer warranties - most are 25-year. We monitor all new systems remotely to make sure they continue to operate properly and are always happy to answer questions. In the unlikely case of an issue, Glow can provide troubleshooting and service support - at no charge for items under warranty.

Glow can provide the information you need to determine if solar is right for you - at no cost with no obligation. Call (833) 456-9765 or visit goglowsolar.com/contact to get started.
